Account Loader

Account Loaders are a key component to support print and copy account systems. The Model 7880 Account loader supports deposits and can allow users to purchase cards.

Functionality

Due to the minimal operator assistance required, the account loader is ideal for use in busy locations to enhance the customers experience by supporting a self-service environment. The unit is equipped with a 7.5" touch screen panel, which guides the user to complete the transaction.

Account & Card Loader, Model 7880

Account and Card Loader is used to add value to user accounts over a network via TCP/IP. It can be configured to accept any combination of coins, bills, or credit/debit cards to add value to a user's account or dispense new cards.

The Loader can be configured to accept various card types such as; ABA magnetic stripe, Mifare contactless, prox, or barcode for account authentication. Optional accessories include supporting credit cards for purchases, card dispenser, receipt printer, high security lock, and a pedestal base.

Credit/debit card acceptance is achieved using an integrated system based on cellular technology.
