# PayStation Swift

*The perfect solution for charging and controlling for the use of copiers, MFD's or print release stations using credit/debit cards only.*

## Functionality

The PayStation Swift, Model 5400-EPORT utilizes an integrated cellular based credit/debit card solution to process payments.

The PayStation Swift can support worldwide credit/debit cards to allow customers to perform copy and print functions. It interfaces to most MFDs manufactured worldwide and PaperCut print management software packages.

Hosted web reporting features include credit and debit card transactions to provide easy reconciliation. The PayStation Swift does not require any local networking.
