

## > Bill Box M-600

### Top Functionality:

The Bill Box M-600 is today's most affordable equipment available for market savvy institutions looking for an efficient way to recharge student accounts. "Cash-to-Account" functionality in addition to the PaperCut MF Print Release Module compliments these units, providing a student self-service environment requiring no additional onsite staff supervision. The Bill Box M-600 adds value to Users PaperCut MF Accounts accepting such monies combinations as (\$1, \$5, \$10, and \$20) and optionally coins (1c, 5c, 10c, 25c, \$1 coin). Additionally, the collected revenue remains securely locked. Easy access is granted through the front of the Bill box for quick bill jammed errors allowing for efficient and reliable continuation of service.

The Bill Box M-600 may be conveniently attached to an existing Print Release Station Table for the use of commodity hardware already in place or optionally can be set up on a 30" stand, making the integration of the Bill Box the most affordable and inexpensive solution for your Print Management System when providing recharge account services, two valuable systems that permit Users to recharge their personal accounts, as well as, navigate pending print jobs in queue.

### The Bill Box M-600 includes:
